Educational Qualifications			
B. Tech Computer Science and Engineering	2027	Gandhi Institute of Technology and Management, Bengaluru	8.92/10
XII Board of Intermediate Education, AP	2023	SV Junior College, Kadiri	85.1%
X Board of Secondary Education, AP	2021	Khadri High School, Kadiri	98.83%

Certifications	
- Sales Force-Agent Specialist Certification - Python 3 Programming Specialization-University of Michigan (Coursera) - Mastering Advanced Generative AI Models - 6-Day Workshop - GITAM University	

Projects	
Real-Time ASL Gesture Detection & Speech Converter	- Built a real-time ASL gesture recognition system using MediaPipe for hand landmark extraction and a Keras deep learning model, enabling live sign-to-text conversion via webcam - Enhanced an end-to-end ML pipeline covering data preprocessing, model training, and real-time inference, with a text-to-speech module to improve accessibility for the hearing-impaired - Trained a multi-class neural network classifier on an ASL dataset, deploying the model as a modular Python application with separate components for detection, prediction, and output
WhatsApp MCP Integration	- Created and developed an AI-driven WhatsApp assistant using Model Context Protocol (MCP) to enable autonomous message handling and intelligent intent recognition. - Integrated WhatsApp APIs with LLM-powered agents to execute tool-based actions and support real-time conversational workflows. - Built a scalable agentic automation framework to manage multi-step interactions, improving response efficiency and user engagement.
Real-Time Weather Application	- Built a real-time weather application in Python by integrating a third-party REST API using the requests library to fetch and parse live weather data including temperature, humidity, and conditions - Implemented dynamic city-based search with JSON response parsing, HTTP status code handling, and robust error management for invalid inputs and network failures - Designed an event-driven GUI using Tkinter with real-time UI updates, delivering a responsive and user-friendly experience based on live API responses

Internships	
Virtual Internship	Jan'26-Feb'26
Skill Craft	Data Science intern
Intern spot Virtual internship(on going)	Feb'26-April'25
Data Science	- Completed structured training in Python and data science, strengthening analytical and problem-solving skills. - Applied file handling, Excel processing, CRUD operations, and exception handling to build reliable, error-resistant applications

Skills	
Problem Resolution Innovation Empathy Management Data Analysis Strategic Planning	
SQL Python C Gen-AI Computer Networks Operating Systems Machine Learning LLM Agents API Integration	
Tools	
MySQL Git MS-Office Open-AI API Google Colab VS-Code LangChain Tkinter	

Extra-Curricular and Achievements	
Student Lead	Organized and managed industry speaker sessions, handled speaker coordination and event logistics, and led a team to deliver engaging events..
Organizer	Led hackathons, Aarambh events, and technical workshops. Organized SmartIDEathon 2024, a national-level Ideathon, managing full event execution, logistics, and team coordination
